DETAILED ACTION

Allowable Subject Matter

1. Claims 2-10, 12, and 13 (renumbered 1-11) are allowed. The following is an examiner's statement of reasons for allowance: the closest prior art of record is Tsihlas (WO 02/085648). As best depicted in Figure 3, Tsihlas teaches a pneumatic tire construction including a tire cavity resonance restricting device comprising a plurality of cross-sectional changing members (blocks) and an elastic fixing member (strip or tape/ribbon). More particularly, the non-attachment portions of the strips (those not containing blocks) have a greater length, and thus necessarily a greater mass, than the attachment portions of the strips (those containing blocks). However, the non-attachment portions of Tsihlas are not formed with a greater thickness or a greater width, as compared to the attachment portions, and one of ordinary skill in the art at the time of the invention would not have found it obvious to modify the elastic fixing member of Tsihlas to include such an arrangement. Additionally, one of ordinary skill in the art at the time of the invention would not have found it obvious to include holes in the elastic fixing member of Tsihlas.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
